APRIL 2015

Hello and welcome to your 4th newsletter of the year.

We hope you all had a good Easter with the weather being kind to us all.

March's club night.

We invited the neighbourhood watch team to come and give us a talk on how to protect our neighbourhood. We were advised to mark our good and cars with Smart Water that can be traced back to ourselves even if the stolen article has been broken up and parts sold separately.

It was a night full of interesting tips and advice that had us thinking about better protection our property.

Thanks were given for a really interesting evening.

Thanks also to members who entered the Easter egg and bonnet competition some thought and work went into them. Well done to all prize winners.

Redmire

We have received this report from members who attended this small show.

We arrived at Redmire on Good Friday for a weekend displaying vintage transport to help support the Wensleydale Railway. The weather to start with was extremely wet but the sun came out on Saturday and with it, the public. Three trains a day arrive at Redmire Station and Passengers alighted from the coaches to just look around the small display we had put on or they made the walk to Castle Bolton to look around the impressive 14th century castle they have there. While some had a wander around the nearby village of Redmire. Where the pub served lovely meals.

People from York and Bradford as well as local areas came to support this gathering.

Tea and coffee were served to passengers and walkers who seemed to appreciate a drink on a warm weekend.

The money raised from sale of these refreshments was sent to Wensleydale railway to help with the constant fund raising they are engaged in.

A letter from a valued member

Hi Folks,

As a retired lucky cuss who can spend the winters in Florida, I spent a couple of consecutive 'holiday stints' recently restoring a 1957 Ford Fairlane 'Retractable' Hardtop over here and am now enjoying the fruits of my labours. Clever all-mechanical mechanism (no hydraulics) puts folding hardtop in 'trunk' when not required - 7 reversible motors, ten power relays, twelve limit switches and lots of self-resetting circuit breakers (overload trips) - not too daunting a prospect after my working for many years at a microswitch company in Gateshead. So great fun! 17'7" long, 4100 lbs, 312 cu inch (c.5 ltr) engine and as quick as anything up to 10 mph! Loves straights, hates corners and pulls admirers like you wouldn't believe! Especially the very knowledgeable womenfolk! Finding the thought of parting with it over here very difficult so looking at the possibility of bringing it back to 'Blighty' and continuing to cherish into my dotage despite insane running costs with UK fuel prices an' all!

Longstanding but dilatory member #147 (currently central Florida)
